**Subject:** RE: Supplemental Wetland Methods Memorandum

Hi Mary,

I am responding on behalf of Ellen and Ben.

The Corps accepts the wetlands methodology approach as presented for the community route and the applicant's preferred alternative. We would be in support of field work, if the opportunity presents itself, or changes to the methodology for the purpose of enabling improved and valid comparisons among alternatives in the EIS. If you have any question don't hesitate to call me or email.

Thank you.

Best,  
John Sargent

**Subject:** [Non-DoD Source] RE: Supplemental Wetland Methods Memorandum

Hi Ellen -

Just checking in to see if you have reviewed our information and if we can get an email confirmation that our methodology is accepted. We would like to start working on the wetland mapping as soon as possible.

Please feel free to call with any questions.

Thanks  
MET

Subject: Supplemental Wetland Methods Memorandum

Hi Ellen -

Per our conversation on data to be used in the wetland mapping of alternatives for the AMDIAP EIS, attached is a supplemental memorandum summarizing the data sources and availability. I have also attached the initial memorandum that provides an overview of the methods.

Please feel free to send me any questions. If this is sufficient, we would appreciate written acknowledgement of the Corps' acceptance of our proposed wetland mapping methods for the EIS.

Thank you - and happy 2019!
