

ALASKA INDUSTRIAL DEVELOPMENT & EXPORT AUTHORITY

AMBLER ACCESS PROJECT

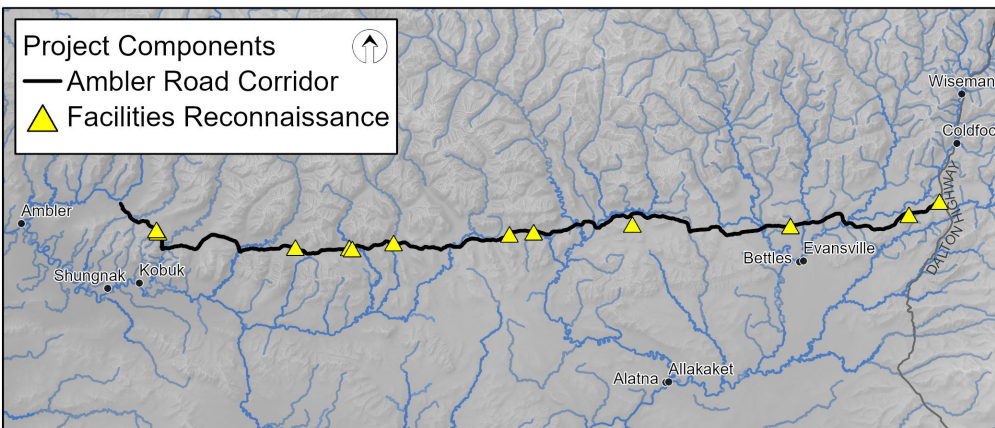

Ambler Access Project

Public Notice: Engineering Reconnaissance

Schedule window: Spring - Fall

What We're Doing:

Field investigations are planned to support, verify, and refine the roadway alignment described in the Environmental Impact Statement (EIS). The civil design crew will examine areas on the proposed roadway alignment and bridge crossings to identify geohazards, maximum grade areas, optimize critical water crossings, and other terrain challenges. The facility and communication crew will investigate proposed material sites for siting maintenance facilities and communication infrastructure.

WHAT?

Engineering
Reconnaissance

WHEN?

Spring - Fall

WHERE?

Overflights and locations along the roadway, bridge crossings, proposed maintenance/communication facilities,

WHY?

Support, verify, and refine the roadway alignment for the AAP.

WHO?

2 - 4 engineers, geologists, or technicians per crew
